

Temperature -7422 and Ergonomics:

Temperature of the plates is 240°C (460°F) and is maintained throughout the process.

* The temperature is 240°C (460°F) and is maintained throughout the process.

* Ergonomically, the device is designed to be used with one hand, making it easy to use.

* The device is designed to be used with one hand, making it easy to use.

* The device is designed to be used with one hand, making it easy to use.

* The device is designed to be used with one hand, making it easy to use.

* 360-degree rotation, 3 different settings.

* GHD, the device is designed to be used with one hand, making it easy to use.
