Delivery terms:	Airshipment or seashipment

How to use:

Follow the guide below to create classic, natural looking waves. I'm using a 25mm curling iron.

1. Separating your hair into 2 sections.
2. Start by holding the curling iron vertically with the clasp facing forward. Then clamp a 2 inch section of hair about 1-2 inches from the ends. Curl the hair out and away from your face, all the way up to the root. Hold for 7-12 seconds depending on your hair texture. Always curl the front pieces away from your face.
3. The result should look like picture 5:
4. After you have done some curls, please switch up the direction of the curl to create a really natural look. Just be sure to twist the iron towards your head for an inward curl.
5. Hold the iron in the curl for less time, about 5-7 seconds, for a looser effect.
6. Repeat until you have done all the hair.
7. Then spray the curls and you are finished.
