How to use infrared hair flat iron for straighten and waves:

[The infrared hair straightener makes hair looks shinier and healthier](#), so it is the perfect tool for both straightening and curling for all hair types.

Straighten hair:

1. It's very important to work in layers when straightening hair, starting with the bottom layer of hair. you can start from the top half if you have fine, thin hair.

Choose how many layers you want to work through and run your iron over hair only once.

2. Once hair is clipped, you'll work your way around the bottom layer. Grab 1-inch sections of hair, clamp the iron down as close to the scalp as possible. pull iron down the length of hair gently.

3. Repeat the same process until all the layer is finished.

4. Finish with hair spray for perfect result.

You can also creat waves using a hair straightener:

1. Begin with 1 inch section of your hair, starting from the roots, curl the wand away from your face.

2. Keep turning the iron as you approach the tip, slowly release the clamp as you get close to the ends for a more modern look.

Naturally Straightened

Big wave S style

Tail sticking out style

Tail curled C style
