### **How to use the professional hair flat iron EMS-7116:**

Preparation before flattening

1. Clean and dry your hair
2. Switch on the product and heat up the product and get ready to style
3. Brush your hair smooth and nice.

Hair straightening:

1. Separate the hair into several sections, and leave the bottom of the hair for style first;
2. Pick up the first small section and clip with hair flat iron from roots, but please pay more attention about the high temperature appliance in case any chance to burn your scalp;
3. Slide the hair flat iron down to tip slowly, and don't stop your iron on any point too long, the high temperature will damage your hair.
4. Release the section, and do the same things for other sections.

If the straightening hair doesn't come after your one time straightening, you could try it again, or setting your temperature more higher.

Please pay more attention about the temperature, setting the temperature form lower degrade to high degree,

or start from the midium temperature, because high temperature may damager your hair and how high of the temperature you should setting it's depends on your hair texture.
