Delivery details:	30 days after the deposit

How to use:

How to use a triple curler?

Sectioning Of Hair: It is advisable to part the hair into different sections. Avoid styling the hair in bulk. It will be a waste of time and energy. First of all, grab half of hair from the top and secure it to the top with a hair clip. Grab the section of 1 inch and leave the rest. This way, only style the one hair section at a time. While securing the rest with hair clips.

Curling: Now with a hot barrel create curls on the 1 inch section you selected. If you want loose curls, then move away from the roots of the hair. In case you want a vintage look, give curls starting from the roots of the hair.

Hold The Waver: While making curls, release the hot barrel from clamp after 4-5 seconds. Avoid holding the barrel for a long time. Otherwise, you will end with fried up hair. Repeat the above-cited process until the last section of hair is having curls.

Finishing: In the end, use hair spray or pomade to hold the hairstyle for a longer period.
