Delivery details:	30 days after deposit

### How to use:

With a little practice, you can master this simple technique. This hair brush is easy to use.

1. Divide wet hair into sections, using claw-style clips to keep them separate. Leave one section down in the front to be dried first.
2. Start to place the hot roll brush under the loose section of hair and aim the blow dryer down, holding it well above your hair to avoid overheating your hair. Slide the brush through the section slowly for a better effect. Repeat until the section is dry.
3. For adding volume, place the brush under the roots and aim blow dryer at the hair in the brush for a few seconds before pulling the brush through.

4. For making a curl or flip to the ends of your hair, run the brush through a section and hold the brush at the ends, either flipping in or out while blow drying. Set the curl by leaving the brush in place until the hair is cool. Repeat with all of your hair.

Take your time and let each section dry completely before moving to the next.

6. Give a spray of hair spray, and you're finished.
