Delivery:	30 days after deposit

**How to use it:**

1. Wash your hair with a hydrating shampoo, and condition your hair with a hydrating conditioner after shampooing. This prepares and protects your hair for styling with a flat iron.
2. Apply a heat treatment, or mist your hair with a thermal protection spray and dry your hair with a blow dryer, Heat treatment protects your hair during styling and helps your style last longer.
3. Start off on a lower temperature setting and work your way up to a higher setting as you determine your hair's tolerance for heat.
4. Grab hair between the plates near the top of the scalp and move quickly from root to tip. Never allow your flat iron to pause on a section of hair. You should flat iron your hair in a fluid, steady motion, applying only gentle pressure to the hair that is clipped between the heated plates.
5. The important tip is that do not slide too quickly for a better straightening result.
