How to use heated round hair brush EFC-8262 get a curl:

The first step to start the hair styling is to wash your hair, blow dry and separated all the hair into two large section, top and bottom, binding the top section and left the bottom section for styling first.

Then separated the bottom section into several small section, and switch the heated iron on, get ready to style.

Take a section, brush your hair from roots and then stop at the a quarter inch and turns, run the hair brush through and wrap the hair around just once, and put down towards about a third of the hair, twirling the brush, and hold the brush for a couple of seconds then put it out with twisted motion, and that just gives you a curl at the tobbom of the hair.

Take another inch of hair, slowly around the heated hair brush through it, smooth the hair slowly and twist when get about half way through, and turn the heated round hair brush towards the opposite way, but only twist your hair around hair once, hold for several seconds, you could pull the hair brush down, and then, there is the little curl at the bottom.
