How to use:

There are two tips to curl your hair with this F998EL professional heated curling iron. First of all, clear your hair and brush them smooth, take a small section and gets ready to style. When you use your curling iron, you will always curling from roots to tips, you'll never wanna start from the tips because this is must fragile part of your hair, after you section the hair and brush it through. Then, option one of the hair curling, seizing the hair and open the hair iron clamp up, and start up the root, wrap it a round, then hovering the clamp open, crashing your way down very light movement.

Another technique we can do by this heated curling iron is, hang down the curling iron and open it up, seizing the hair wrap the section hair around from roots to tips. Keep wrap around and hold the tips by your hand, touch the wrapped hair by your fingers, when you hair gets warm, go ahead and let it down.

So below is the different curl effect by the two curling way with the same size barrel. But please pay more attention about the temperature, it's better to setting a lower temperature when you start to use it.
