How to use:

The infrared hair straightener makes hair look shinier and healthier, so it is the perfect tool for both straightening and curling for all hair types.

Here is simply ways for curls with a flat iron.

Preparation before straightening: Start with completely clean and dry hair, Apply heat protectant.

Curls: Grab the section of hair you want to curl, Starting fairly close to the scalp (but not close enough to accidentally burn it),

clamp the iron closed and turn it back on itself a half turn. Run the iron slowly down the hair shaft to the end, Again, the slower you move the iron, the tighter the curl. If you like big soft curls, faster you move the iron.

After finish, never forget to use the hair spary to keep long-lasting result.

Naturally Straightened

Big wave S style

Tail sticking out style

Tail curled C style
