**Option 1: All plastic teeth**

Option 1: All plastic teeth. This option is suitable for those who prefer a gentler straightening process. The plastic teeth are designed to be smooth and rounded, reducing the risk of hair damage. It is ideal for delicate hair types and those who want to maintain their hair's natural texture.

Optional 1: All plastic teeth

Optional 2: All metal teeth

Optional 3: Half plastic teeth & half metal teeth

**Option 2: All metal teeth**

Option 2: All metal teeth. This option is designed for those who want a more aggressive straightening process. The metal teeth are sharper and more durable, providing a more effective straightening effect. It is suitable for thick or coarse hair that requires more heat and pressure. However, it may be more damaging to delicate hair types.

Blister inner tray
