How to use:

Wide plate hair flat iron is very good for long and [thick hair, not only for large curls but for hair straightening.](#)

1. Curling: take a section of hair, clamp the hair closed to the root in between the plates, twist the straightener a full 360 and glide down the length of the hair, rlease the curl and twist the hair with your finger to shape.
2. Straightening: adjust the proper temperature for your hair, you can start to place the iron close to the root of

hair and slide through to the ends without stopping. The key points is that never slide too quickly for a better straightening result.
