How to use it in short hair:

How to use hair crimper for styling, here is some usefull tips for your reference.

Step1: Wash and dry hair, the iron won't work on wet hair. Before straightening,you need to condition your hair and brush out any tangles;

Step2: Apply a heat protection product like Argon oil to protect your hair from heat damage;

Step3: Plug in the hair crimper and heat up for 1-3 minutes;

Step4: Decide which parts of hair do you want to styling, and then style hair into sections;

Step5: Grab a section of hair with your free hand and slowly clamp down the crimper iron using the other hand from the roots. Get as close to your skin as possible without burning it;

Step6: Hold down for about 5 minutes, and release the clamps. Slide the tool down the length of your hair and clamp down on the next section, until the whole section is finished;

Step7: For longer-lasting waves, secure the style with hair spray.
