How to use it:

This is a very simple work to use a professional smart spin curler when you at home, but we need to prepare a large volume comb, or you can use your finger when styling, but don't use regular narrow comb during the styling.

So we just go to take a section hair, and comb your hair all the way through smoothly, and you determine whether you put your iron up or down, do most comfortable for you.

Open the iron, and winds your hair on the iron backs and round, and keep the hair flatly.

You could slide iron up and down slight, and makes the hair winds closer, and hold on iron for a several seconds.

Next step, use your finger to feel the hair, when your finger feeling hot, pull out the iron and the rollers will come through.

Finally, work with your hand, using fingers comb the curls.
