### **How to use:**

[Hair care Heated PTC hair iron F178C is good for curling and straightening.](#) Here is some steps for hair styling. All the hair styling should start from soft, clean hair that's free of tangles.

**Straightening:** Divide your hair into several small sections, plug in and heat up the iron to desired temperature for your hair. Clip the hair section with the iron, and slide your way down from roots to tip, repeat the same operation until all the section is finished.

**Curling:** place the hair crimp iron to root, and twist the flat iron and turn it 360 degree until the section hair wrap around the flat iron , then pull your styler down slowly.  
So the important 3 steps to curling hair with hair iron: twist, twirl and toss. after that, you could go ahead the next section.  
Gently run your fingers through your hair and tousle it. You'll get a little more volume, and a relaxed, natural look.
