### Styling tips for hair styling iron EMS-7117:

[EMS-7117 is one of the best crimp plate hair styling iron with 40mm board plate](#). Professional salon hairdressers use crimpers to give their celebrity clients the big hair look that we all love.

1. Crimping is a easy way to creat texture and root lift, you can get right in to the roots for a really long lasting effect.
2. Depending on your hair type, set the ceramic heating plates to adjustable temperature 140C to 220C degrees. The lower heat setting for delicate, fine or coloured hair. The higher temperature for thick, coarse hair.
3. For optimum hold and lift, use hairspray at the root of each hair section before using the Root Boost. For maximum body and fullness, start by sectioning a small layer of hair at the nape of the neck and begin crimping the hair close to the root, continue around the hair line of the section.
4. Continue releasing sections of hair down and adding texture at the roots until you have the level of volume you want.
5. Don't crimp hair too close to the top section to avoid crimp mark.

**The other crimp hair styling iron you may interested in:**

[F308E is a professional salon usage hair curling iron with wave plate](#), which is much different from regular hair flat iron and curling iron effect, wave plate can make crimp hair with excellent effect. F308E we designed with black injection shell and good quality cool tip, the plate size is 98mm x 45mm, temperature display is 5 light digital readout, 2.65M PVC wire plus 360 degree free swivel cord, which is more convenience when working.
