How to use it:

It is perfect tool for quick, [effortless straightening, curls and waves, suitable for all hair types and lengths.](#)

Step 1: First thing you need to is wash you hair using a high quality shampoo, and conditioner and then blow dry your hair with a hair dryer.

Step 2: Apply a heat protection spary, Spary on the heat protector and then comb or brush through hair.

Step 3: Before straighteing hair, you should separate your hair into equal sections.

Step 4: Straighten your hair

1) Plug your hair iron and wait for it to heat up.Normally it takes about 30 seconds to reach proper temperature;

2) Choose a section of hair and straighten from the root to tip,clamp the hair flat irons around the hair at the root and apply pressure as you pull down.

3) Continue to straighten your hair until all sections be straightened or you got the desired result.
