Useful tips for using the professional curling wand:

Here are some useful tips for using [the curling iron with F998EL professional styling hair curler](#).

1. For tighter curls, a small-barreled iron is your best choice, for loose curls, try a large size of barrel iron.
2. Curl your hair while it's in a high ponytail for quick, effortless waves.
3. Instead of clipping your hair to the end and spinning the iron up, clip in closer to the roots.
4. Face the clasp forward to spin the hair through more easily.
5. Curling the hair in the direction away from your face on either side for a more natural, volume style.
6. The closer to the root, the longer curl result.
7. For fine or thin hair, select the heat below 120C, but for thick or wave hair, the temperature should be 200-300C.
