How to use it:

Deep waver iron creates loose S waves for frizz-free waves with massive shine, and follow the step and you can make sexy waver easily.

Step 1: First you must make sure your hair is totally dry and clean before use your triple curler;

Step 2: Apply heat protection which creates a protective coating around the hair shaft and helps

prevent damage;

Step 3: Section off your hair. It's so easy to add waves to your hair one section at a time, moving from one side of the head to the other;

Step 4: In order to make a loose, sexy looking wave, you need to start further away from the roots of your hair;

Step 5: Hold the deep waver down for 4-5 seconds. Create the first wave by clamping the waver down at your starting point and holding for a few second;

Step 6: Move around and then up. Repeat until the bottom half of your hair is finished and then move onto the top section;

Step 7: Finish the styling. Once you've styled all the hair, use the hairspray to maintain the style.

Step 8: If you are going for a more natural look, run your fingers through the waves to loosen them, or turn your head upside down and shake to separate the waves.
