How to use:

How to curl hair with a mini curling Iron

A mini curling iron can be used to create different styles. To curl hair with a mini curling iron, try the following methods.

1. Heat up the curling iron. Turn on the curling iron and heat it to 210 degrees.
2. Brush your hair thoroughly. Make sure there are no tangles. The hair should be thoroughly dry before curling.
3. Spray a heat protectant to your hair. -optional
4. Styling in sections, curl your hair. Using just the wand, wrap your section of hair around the barrel. Be sure not to overlap your hair, as this will reduce heat and result in limp sections. Use your fingers to hold the edge of the section of hair close to the barrel without burning your hair. To alternate the curling direction between clockwise and counterclockwise for a more natural effect.
5. Once a curl is down, quickly pin it up. Continue until all of your hair is pinned up. then wait until the curls are no longer hot before you take off the clips.
6. Manipulate curled hair, if desired. And lightly spray hairspray to give your curls hold. When spray the curls, always remember, less is more.
