How to use:

Hair flat iron F178A is easy for hair straightening or curling.

1. Always wash your hair deeply and thoroughly and use the heat protective serums prevent damage caused by straighteners, this is important before straightening process.
2. Use wide tooth comb to eliminate tangles from hair.
3. Plug in your iron and select desired temperature according to your hair type. the thicker and frizzier your hair, the higher the numbered setting should be.
4. Separate your hair into several sections. the key is to make section one to two inch thick so that they can easily pass through the straightener.
5. Place the hair irons as close to the roots of the section as possible without burning yourself.
6. Clamp the iron down so that the heat sides touch and your hair rests between them.
7. Run the flat iron down the length of your section of hair.
8. Apply a hair spray or a setting spray to keep your hair straight all day.
