How to use it:

It's very east to handle the hair flat iron to make the straight hair if you have the right hair iron. Ceramic flat iron are the most popular hair iron for salon user or home user.

First of all: wash your hair and blow dry then brush them smoothly, preparing your hair for styling.

2nd step: switch off your hair flat iron and get ready to styling.

3rd step: separate your hair into several sections, how thin of the section is depends on your hair texture.

4th step: using your hair flat iron clip the hari section and putit as close as to the roots, but be careful and don't burn yourself.

5th step: make our way down slowly from hair roots to tips, but please don't hair iron in the same spot for long as this will damage your hair.

6th step: run the flat iron down again if you think your hair is not straight as you imaged, just do the same work.

7th step: do the same work as the first section hair styling.

The similar hair flat iron you may like:

Professional negative ion generator hair straightener F601EL, it's also the extra long flat iron and floating with negative ion generator, this products is also popular and hot selling in 2016.
